

Cool Cruisers of Southwest Florida,

On behalf of the staff and students of Lorenzo Walker we would like to thank your club and its members for helping to make the 2017 Fly-In/Cruise-In such a great success. The Fly-In/Cruise In was developed specifically to raise emergency scholarship monies for those deserving students to assist them in remaining in and completing their chosen program. Approximately 67% of our students require some form of financial aid to complete their training.

Lorenzo Walker Technical College is a not-for-profit school and part of the Collier County Public School System that trains students for high paying jobs. Our certificate programs provided by the school are developed based on the needs and requests of our business community. Our adult students are trying to improve their economic situation. The average wage increase is about \$7.00 per hour, over their current salary, when they complete their program at LWIT and are placed in the workforce.

LWTC graduates serve our community infrastructure in almost every capacity. Over 90% these students remain in Collier County upon graduation, and these graduates are everywhere in our community and hence our lives.

On behalf of our staff and students, please accept our heartfelt thanks and appreciation for your club's generous support of our Fly-In/Cruise in. Without you it would not be possible to attract the public to this event that supports our student success!

Hope to see you again next year-

With sincerest gratitude,

Jack Izbicki
